In 4F we have been doing tessellations.

A tessellation is a pattern with no overlapping and no gaps. We looked at some of Escher’s tessellations which were very detailed.

You need to be careful with the cutting because if you cut a bit off, it won’t look as good as it could, and the shape won’t tessellate.

If you would like to look at some of Escher’s work you can go to this website.
