

## Harvest time and autumn planting in the Prep Garden

Charlize and Arabella helping to plant and water the pea seedlings

A big Thank You to all parents and kids for all your help with watering and sweeping these past few dry weeks.

Our Prep gardeners have been busy harvesting 'Sunny the sunflower', as well as the beans and corn and digging up the soil in the containers. They even found some potatoes!

'Sunny' spent some time drying out inside the Prep building and the Preps have scooped out the seeds and stored them to replant in Spring.

This week they have planted new veggies for autumn - carrots, peas and radishes - and made signs to show which seeds are planted.

Their next job will be to build a pea trellis for the sugar snap peas and sweet peas to climb on.

Thanks to parents for helping with planting, donating seedlings and providing compost and chook poo for our garden.

Now we just need rain!
